Washington, DC 20426

**Re: Article 404-Water Quality Monitoring Report for 2016  
Sturgeon Falls Project, FERC No. 2720**

Dear Secretary Bose:

Pursuant to the requirements of Article 404 of the Order Issuing New License dated January 6, 2005, as amended by Order Amending License dated December 8, 2006 and the Order Approving and Amending the Water Quality Monitoring Plan dated May 18, 2006, the City of Norway, Michigan (City) as the licensee of the Sturgeon Falls Hydroelectric Project (FERC Project No. 2720) is providing a copy of the dissolved oxygen and temperature monitoring results for the second half of the 2016 monitoring season.

As described in the City's letter to the Commission dated November 11, 2016, which provided the monitoring report for the first half of the 2015 monitoring season, the City was forced to discontinue monitoring in July of 2015 due to equipment malfunctions and again resumed monitoring in July of 2016 with newly purchased equipment. The November 11, 2016 letter to the Commission and the 2015 monitoring report was also provided to the Michigan Department of Natural Resources (MDNR) and the Michigan Department of Environmental Quality (MDEQ).

Appendix D-4 of the enclosed report provides the required summary of daily maximum and minimum readings for temperature and dissolved oxygen for the first half of the 2015 monitoring season and the second half of the 2016 monitoring season. Inclusion of the 2015 summaries finalizes the draft 2015 report provided to the Commission on November 11, 2016.

Should you have any questions relative to this information, please do not hesitate to contact me at (906) 563-9961.

Sincerely,

Ray D. Anderson  
City Manager
